

Grant from the CPMT

Employers: the CPA Montréal relies on your cooperation!

The Parity committee of the automotive services industry in the Montréal region (CPA Montréal) has recently obtained a major grant from the Workforce Skills Development and Recognition Fund of the Commission des partenaires du marché du travail (CPMT). This means that many of the industry's workers will benefit from financial support for training during fall 2014 and winter 2015. However, to comply with the CPMT's terms, the CPA Montréal must seek your cooperation.

Crucial information

Being the administrator of the grant and as Emploi-Québec's partner, the CPMT requires that the CPA Montréal provides **the name, the Quebec Enterprise Number (NEQ) and the total payroll for 2014** of the employers. The CPA Montréal therefore needs to get this information from you. This is a mandatory condition for receiving funding. Without this information, it will be impossible for the CPA Montréal to provide workers the training courses at the subsidized price to which they are entitled.

660

Beneficiaries of
financial support for
training

55

Training sessions targeted
(preparatory to the exam and
continuous learning courses)

2,00\$

Registration fees
per hour of
training

Courses objectives

The training courses offered through the CPA Montréal are developed by experts and meet your specific needs. They especially aim to support workers in their preparation for the final apprenticeship exam, as well as teach them the industry's new practices. The grants received facilitate access to these training courses. Without financial support, many workers could not afford to take them.

If one of your employees is eligible to receive financial support for training through the CPMT's grant, you will receive a form for you to provide the above-mentioned information. Rest assured that this information is only collected as part of this program and that it will be handled in a strictly confidential manner. For more information about the grant or the requested information, please do not hesitate to contact the Qualification and Training Development Department at 514 288-3003.

On behalf of the industry's workers, thank you for your cooperation!
